

Mechtrix Equipment

In addition to our complete line of cutting and stripping blades, Mechtrix has also designed a number of unique machines to solve specific wire processing problems. These machines range in complexity from our patented center stripping machines to terminal paper winding machines. The complete line includes:

- Wire Prefeeding Equipment
- Benchtop Wire Stripping Machines
- Automatic Center Stripping Machines
- Terminal Carrier Strip Cut-off Devices
- Terminal Paper Winding Machines
- Terminal Applicators
- Crimping Presses

The Mechtrix Advantage

Quality

- ISO 9001:2008 Registered

Technology

- 15 - U.S. Patents for Wire Processing Devices
- Professional Engineering Staff

Customer Service

- A Knowledgeable and Helpful Staff That Knows and Understands Your Equipment

Delivery

- Industry Leading Turnaround Time for Custom Blades
- Most Orders for Standard Stripping Blades are Shipped the Same Day

Satisfaction

- Mechtrix Quality Assurance and Performance Guarantee

The Mechtrix Advantage

If you want superior tooling value, fast delivery, knowledgeable customer service or if you need custom blades to automate a difficult or manual stripping job, Mechtrix is the answer. Mechtrix designs and manufactures a full line of standard replacement stripping blades in addition to custom stripping blades for virtually all automatic wire processing machines. We currently manufacture over 30,000 different blades, including blades for machines made by the following companies:

- Amp/Tyco
- Schäfer/Megomat
- Artos
- Schleuniger
- Eubanks
- Shin Maywa
- Kodera
- Toyojamco
- Komax
- and many others...

All Mechtrix blades are made from specially alloyed tool steels or tungsten carbide using state-of-the-art machine tools to produce the highest quality, best performing blades anywhere. Mechtrix Corporation is ISO 9001:2008 registered and is a certified supplier for the automotive, appliance, electronic and medical industries. 25+ years of continuous service, dedicated solely to the wire processing industry, demonstrates our long term commitment to our customers.

Stripping Blades

Mechtrix offers both standard and specialized stripping form geometries, many not available anywhere else. Blades utilizing the stripping forms below can be made for virtually any machine.

“Universal” Stripping Form

Advantages

- Fastest set-up and changeover time
- Greatest range of adjustability

Typical Applications

- Easy to strip PVC and soft insulations

“V-Style” Stripping Form

Advantages

- Adjustability over a range of wires
- Up to 60% circumferential cutting

Typical Applications

- PVC, Neoprene and Silicon insulations

“M-Series” Stripping Form (Patented)

Advantages

- Limited adjustability for wire variation
- Up to 85% circumferential cutting

Typical Applications

- Thinwall PVC, Crosslink, Hypalon and Fiberglass insulations

“Full Radius” Stripping Form

Advantages

- By-passing cutting action
- 100% circumferential cutting

Typical Applications

- UltraThinwall, Teflon, Fiberglass and Soft Jacketed Cables

“Die-Type” Stripping Form

Advantages

- Precise butting cutting action
- 100% circumferential cutting

Typical Applications

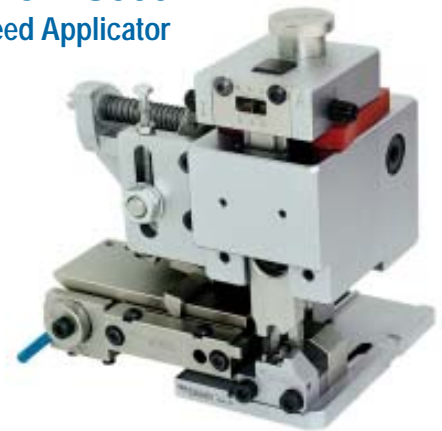

- UltraThinwall, Teflon, Crosslink and Jacketed Cables

Applicators and Presses

In cooperation with THB®, Mechtrix is excited to offer the full line of high quality, value priced THB® applicators and presses. Utilizing the proprietary Mechtrix CrimpCADD® Design Software, we are able to create, analyze and generate optimal crimp form geometries for our customer's specific applications.

Contact us today to discuss your requirements.
